

CITEL

Compact Type 2 hard wired surge protector

MLPCA1-230L-2L

- Type 2 (or 3) 2 phase + N surge protector
- Compact
- Wall mounting
- Status indicators
- IP65
- AC disconnection in case of end of life

	Electrical Characteristics

SPD type		2+3																																																									
Network		220-240V 2-phase + N																																																									
AC system		TT-TN																																																									
Nominal line voltage	Un	230 V																																																									
Max. AC operating voltage	Uc	320 Vac																																																									
Max. load current @25°C	IL	10 A																																																									
Temporary Over Voltage (TOV) Characteristics - 5 sec. Without disconnection	UT	335 Vac withstand																																																									
Temporary Over Voltage (TOV) Characteristics - 120 mn Without disconnection or with safety disconnection	UT	440 Vac disconnection																																																									
Follow current	If	None																																																									
Nominal discharge current 15 x 8/20 μs impulses	In	5 kA																																																									
Max. discharge current max. withstand @ 8/20 μs by pole	Imax	10 kA																																																									
Total Maximum discharge current max. total withstand @ 8/20 μs	Imax Total	30 kA																																																									
Withstand on Combination waveform IEC 61643-11 Class III test: 1.2/50μs - 8/20μs	Uoc	10 kV																																																									
Withstand on overvoltages IEEE C62.41.1		10 kV / 10 kA																																																									
Protection mode(s)		Common/Differential mode																																																									
Protection level @ In (8/20μs)	Up	1.5 kV																																																									
Protection level L/N @ In (8/20μs)	Up L/N	1.5 kV																																																									
Protection level L/PE @ In (8/20μs)	Up L/PE	1.5 kV																																																									
Admissible short-circuit current	Iscrr	10 000 A																																																									
	Mechanical Characteristics																																																										
	Technology	MOV+GDT																																																									
	Connection to Network	Cable with 5-wire of 1.5mm ²																																																									
	Mounting	Wall or plate																																																									
	Housing material	Thermoplastic UL94 V-0																																																									
	Operating temperature	Tu -40/+85°C																																																									
	Protection rating	IP65																																																									
	Failsafe mode	Disconnection and AC line cut-off																																																									
	Disconnection indicator	LED green OFF and AC network cut-off																																																									
	Voltage/operating indicator	Green Led ON																																																									
	Dimensions	See diagram																																																									
	Weight	0.152 kg																																																									
	Disconnectors																																																										
	Thermal disconnector	Internal																																																									
	Installation ground fault breaker	Type 'S' or delayed																																																									
	Standards																																																										
	Standards compliance	IEC 61643-11 / EN 61643-11 / UL1449 ed.5																																																									
	Part number	835265
